01 BRAND IDEA

CLUTRL is pronounced 'Clue Trail.' The split wordmark makes that meaning immediate. The slash is the brand's signature device: a clue, a route, a transition, and forward momentum. The scan corners connect the identity to camera-first play, QR discovery, and augmented experiences.

02 LOGO SYSTEM

Use the horizontal signature for most brand communication, the standalone symbol for avatars and small digital surfaces, and the stacked signature when a square footprint is required. Do not reconnect CLU and TRL or replace the slash with punctuation.

Beacon Lime

#C8FF00

Rally Coral

#FF6048

Signal Cyan

#00D7FF

Beacon Lime is the signature discovery color. Coral is for live urgency, alerts, and competitive moments. Cyan is for navigation, location, and progress. Use one bright accent at a time in most layouts.

04 SPACE, SCALE & MISUSE

Maintain clear space equal to one scan-corner arm around every side of the mark. Keep the square icon's corner radius, slash angle, and open scan-frame gaps unchanged.

Avoid

- Do not curve, rotate, stretch, or outline the wordmark.
- Do not merge CLU and TRL into a single uninterrupted word.
- Do not place the lime mark on a low-contrast yellow or green field.
- Do not add shadows, gradients, textures, or extra route graphics inside the symbol.

05 TYPOGRAPHY

The supplied logo artwork is outlined and does not require a font. For supporting brand typography, use a bold geometric sans for display and a neutral sans for product UI and long text.
